

New Position Available Soon...

Software Engineer

Start Date: September 1, 2008

Salary: Competitive Base

Travel: 5%

Position Overview

EnGraph is seeking a .NET C# software developer to join our energetic development team. We desire a candidate who is willing to follow our standards yet not afraid to introduce other possibilities to improve our development process.

The basic responsibilities of this position would include design, development, unit testing, code consolidation, and code maintenance projects of our transportation scheduling software. Creation of internal documentation and status reporting would be expected. In addition, there will be opportunities to work with design teams in developing modules for new product types and help to provide strategies for performance testing.

You will join a team of leading edge software developers with expertise in multiple development languages. EnGraph Software, in addition to benefits, provides a laid-back yet technically challenging work environment.

Position Qualifications

- ✦ Bachelor's degree in Computer Science, Information Science, or related fields preferred
- ✦ 1-3 years experience in related technical field
- ✦ A drive to develop world-class applications that help people and their company
- ✦ Strong experience with object-oriented programming
- ✦ Extensive experience with Microsoft operating systems, and Microsoft development products (including, but not limited to: .NET, C#, XAML, C++, SQL Server, ASMX and ASPX)
- ✦ Experience with installation and configuration of operating systems and application software
- ✦ Ability to prepare and present weekly status reports for managers including project status, timelines, resource requirements (present and expected), and scope issues/resolutions
- ✦ Ability to provide overall technical support for both infrastructure design and troubleshooting issues for all end users

Position Benefits

Individual Health Insurance, Company Retirement Plan, Short-term disability coverage, a new computer for your specific needs

If you are energetic, self-starting and would find it interesting to work for a small technology company, you'll enjoy working for EnGraph Software. Please submit your resume to Kyle Archer (karcher@engraph.com) or call 913-491-3343 Ext. 120.
