Welcome to the EnGraph GPS Control Room, enabling affordable GPS tracking for your organization. Automatic Vehicle Location (AVL) technology has become easier to implement and far less expensive. Let EnGraph show you how easy it is for any industry....

OFFICE STAFF can...

- see the immediate location of all fleet vehicles.
- communicate through messaging with any vehicle.
- find the best route available for service.

MANAGERS can...

- review fleet movements from any day.
- analyze actual on-time performance.
- manage the entire fleet in real-time.

The EnGraph Difference...

EnGraph can implement different levels of GPS/AVL technology for your organization. From passive GPS tracking with automated downloads to real-time AVL systems. Use integrated Messaging systems to communicate in real-time with MDT, PocketPC, or Nextel/Sprint equipped vehicles. We will help you select the perfect combination of hardware, architecture and software to fit your needs. EnGraph supports most Mobile Data Terminals (MDTs).
